PROJECTS

- **Bike Sales Analysis Dashboard**
 - Developed a comprehensive Bike Sales Dashboard in Microsoft Excel
 - Analyzed sales trends based on factors such as gender, income, age, and commute distance to gain insights into customer demographics and behaviors
- **Hotel Data Analysis**
 - Developed a database to analyze and visualize hotel booking data using MySQL Server and Power BI
 - Accomplished hotel revenue analysis and assessed guest parking capacity
- **COVID-19 Vaccine Tracker**
 - Created a dashboard to track COVID-19 vaccination progress around the world using Tableau for data visualization
 - Analyzed and visualized the data using interactive charts, graphs, and maps
 - Identified trends and patterns in the vaccination data using statistical analysis and data visualization techniques
- **Netflix Financial Risk Analysis**
 - Conducted Monte Carlo simulation to analyze Netflix's financial risk
 - Applied decision tree and FMEA techniques for cost and benefit analysis
- **GBI Inc. Sales Analysis**
 - Developed a query using Eclipse-based design to analyze the company's sales quantity, revenue, discount, and cost of goods manufactured using BW modeling tool in Microsoft Excel spreadsheet
 - Calculated the percentage discount using the percentage function
 - Performed currency conversion for the GBI's sales and revenue
- **Orion Star Financial Analysis Dashboard (SAS-VA)**
 - Provided detailed profitability and quantity data for each category in financial analysis dashboard
 - Assisted in making informed decisions regarding product mix, pricing, and other key business strategies
 - Highlighted low-profit and order categories, identified loss-generating fitness products and top ordering cities to improve profitability
- **SAP CRM Implementation at Global Bike Inc.**
 - Managed basic marketing tasks, such as creating and maintaining new customer accounts and designating contact persons
 - Generated accurate customer account information utilizing the Account Information Sheet
- **Scheduling and Sensitivity Analysis of Models for MedCON PROJECT Management*****8**
 - Utilized Microsoft Project to estimate project completion date by analyzing activity duration and predecessors
 - Revealed the critical path and slack time to assess the project's sensitivity
 - Assessed the relative impact of crashing activities and introduced lags to shorten the project duration
 - Utilized crashing and fast-tracking methods to adjust project time and optimize cost
